

Nancy Dawson

Plymouth. MA 02360

"I am writing to provide comments to the FCC on the E-Rate NPRM, proceeding 13-184. E-Rate has been very important to Plymouth Public Schools because it has helped our students and teachers gain access to a wealth of online resources, communicate and collaborate, and develop the 21st century skills necessary for college and career. However, E-Rate funding levels have not kept pace with my district's bandwidth needs, especially in light of the increasing number of mobile devices students and staff utilize. I urge you to raise the E-Rate funding level to at least \$5 billion per year, which is close to the average demand level for each of the past two years.

As Director of Online Programs for our district, I know that seamlessly infusing digital learning throughout the curriculum is a prerequisite for students to graduate from high school with the skills and knowledge they need to succeed in today's global economy. Access to high-speed broadband is the key to allowing modern teaching and learning to occur in all schools across the country.

We use digital learning to provide online classes to enhance and extend our curriculum for a diverse population of students (including our ELL and students on education plans), to try to even the digital divide, to meet Common Core State Standards, administer online assessment, and to make data-driven decisions. It is imperative we keep up with the ever increasing demand for more bandwidth. The need for a reliable high-speed network is only going to increase in the near future.

The E-Rate program has been a phenomenal success in bringing internet access to almost every classroom in America. In the last funding cycle, applications from schools and libraries requested a total of more than \$5 billion—twice the amount of available funding. I respectfully urge the FCC to increase funding for the E-Rate program to at least \$5 billion to meet this demand. All students need access to high-speed broadband. Our nation's future depends on their success"
